

Healthy for Life

Our mission is to ensure lifelong health by developing innovative therapeutics that target the root causes of age-related diseases

1. Clinical

Lead candidate ready for Phase 2b clinical trial in sarcopenia and osteoporosis

2. Preclinical

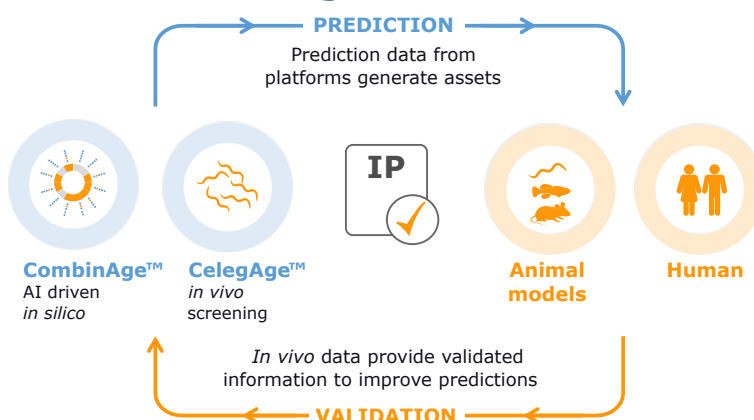

De-risked and safe assets targeting various age-related diseases

3. Discovery

Proprietary and clinically validated platform technologies

How we generate value

Using our **proprietary & validated platforms** we discover innovative drugs that influence aging and predict their potential to address age-related diseases

We build a pipeline of **novel & safe assets** and develop these drug candidates up to clinical Phase 3 with new formulation and characteristics across multiple indications

Our pipeline

| PROGRAM | INDICATION | DISCOVERY | PRECLINICAL | PHASE 1 | PHASE 2 |
|---------|---------------|------------|-------------|------------|------------|
| RJx-01 | Sarcopenia | ██████████ | ██████████ | ██████████ | ██████████ |
| RJx-01 | Osteoporosis | ██████████ | ██████████ | ██████████ | ██████████ |
| RJx-02 | Non-disclosed | ██████████ | ██████████ | ██████████ | ██████████ |
| RJx-03 | Non-disclosed | ██████████ | ██████████ | ██████████ | ██████████ |
| RJx-04 | Non-disclosed | ██████████ | ██████████ | ██████████ | ██████████ |
| RJx-05 | Non-disclosed | ██████████ | ██████████ | ██████████ | ██████████ |

RJx-01 Phase 2b ready

- Combination drug
- Safe & well tolerated
- Orally administered
- Unique PK profile
- Patent protected
- Clinical improvement
 - ✓ Muscle strength
 - ✓ Muscle function
 - ✓ Fatigue resistance

Disease areas

- Cardiovascular
- Metabolic
- Musculoskeletal
- Nephrological
- Neurodegenerative
- Neuromuscular

Three unique success factors

We start from **approved products with safety profiles** suitable for chronic use

We employ our **validated proprietary AI and in vivo platforms**, CombinAge™ and CelegAge™

We secure **20 years of patent protection**, both composition and medical applications & formulation
